Forecast for Thursday 10 Jun 2021

Weather: A rather cloudy day with patchy drizzle, the cloud and drizzle most persistent in the west. However some brighter, drier spells are expected to develop across eastern fells by late morning with some afternoon sunshine possible. Cloud and patchy drizzle become more widespread again through the evening.

Chance of cloud free mountain/hill tops above 800m: Little chance over western and southern fells, but rising to 75% in east in the afternoon

Visibility: Periods or persistent cloud above 450m, with patches below in south and west, becoming more occasional above 750m in the north and east. Away from cloud visibility good falling to just a few kilometres in drizzle.

Meteorologist's View

Valley temperatures in north and east may reach around plus 20 or 21 Celsius in the afternoon

Forecast for Friday 11 Jun 2021

Weather: Mostly cloudy overnight with patchy rain or drizzle becoming more persistent by morning. The more persistent rain and drizzle soon clears to leave a largely dry day with sunny spells developing. Remaining dry with some late sunny then clear spells through the evening.

Maximum wind: Southwesterly 25-35mph, gusts around 50mph over ridges and summits, easing 15-20mph by midday.

Chance of cloud free mountain/hill tops above 800m: Little chance at first rising to 75% by mid-morning.

Visibility: Periods or persistent cloud above about 450m, with patches below in west, becoming more occasional above 750m by mid-morning. Away from cloud, good falling to just a few kilometres in rain and, more especially, drizzle becoming very good by mid-morning.

Temperature: **Valleys:** Around plus 11 or 12 Celsius at dawn rising to plus 18 to 19 Celsius by day
At 800m: Around plus 9 Celsius
Freezing level: Above the summits
